

In the Supplementary Tables, the following abbreviations for the participating laboratories were used:

‘MBA’ for the Mycoplasmology-Bacteriology and Antimicrobial Resistance Unit of Ploufragan-Plouzané-Niort Laboratory of the French Agency for Food, Environmental and Occupational Health & Safety, France.

‘Cefas’ for the Centre for Environment Fisheries and Aquaculture Science Laboratory, Weymouth, UK.

‘FDA’ for the Center for Veterinary Medicine, Office of Research, Division of Animal Research, Laurel, Maryland, USA.

‘MI’ for the Fish Health Unit, Marine Institute, Oranmore, Galway, Ireland.

‘UoS’ for the Institute of Aquaculture, University of Stirling, Scotland.

‘UG’ for the Department of Microbiology, University of Galway, Ireland.

The following abbreviations were used to indicate the antimicrobial agents:

‘AMP’ ampicillin

‘FLO’ florfenicol

‘OXO’ oxolinic acid

‘OXY’ oxytetracycline

Table S1. Range of antimicrobial agent concentrations ($\mu\text{g}/\text{ml}$) in the microplates used to perform MIC test by the participating laboratories.

Lab	Cefas	FDA ^a	MBA	UoS
Source	Thermo Fisher V1	na	In lab ^b	Thermo Fisher 1MPS
FLO	0.06 - 16	0.015 - 32	0.125 - 16	0.03 - 16
OXY	0.015 - 2	0.015 - 32	0.03 - 16	0.015 - 8
OXO	0.008 - 4	0.002 - 4	0.004 - 16	0.004 - 2

^a Data provided by Miller & Reimschuessel (2006)^b ‘In lab’ indicates that the microplates were manufactured by the participating laboratory

‘na’ indicates that the information was not available

Table S2. Number of isolates of *Aeromonas salmonicida* tested by each laboratory in determining minimum inhibitory concentrations (MIC) and disc diffusion inhibition zones (Disc).

	Cefas		FDA		MBA		MI ^a		UoS		UG ^a	
	MIC	Disc	MIC	MIC	MIC	Disc	MIC	Disc	MIC	Disc	MIC	Disc
AMP		58				75		106				106
FLO	50	58	144	144	144	75		106	82			106
OXO	50	58	144	144	144	90		106	82			106
OXY	50	58	68	68	68	28		106	82			106

^a Both UG and MI tested the same 106 isolates**Table S3.** MIC values ($\mu\text{g}/\text{ml}$) reported for the quality control reference strain *Aeromonas salmonicida* subsp. *salmonicida* ATCC33658 by the participating laboratories in tests using a standard method that specified incubation at $22^\circ\text{C}\pm2^\circ\text{C}$ for 44–48 h and the acceptable ranges provided for these tests in VET04Ed3 (CLSI 2020).

	VET04Ed3 Range	Cefas	FDA	MBA	UoS
FLO	0.25 - 1	0.5, 1, 1, 1	na	0.25, 0.25, 0.25, 0.25	0.25, 0.5, 0.5, 0.5
OXO	0.008 - 0.03	0.015, 0.03, 0.03, 0.03	na	0.03, 0.03, 0.03, 0.03	0.008, 0.015, 0.015, 0.015

OXO	28-40	29-33	na	29-34	na	na
OXY	25-35	29-30	na	31	na	na

For *A. salmonicida* ATCC 33658

	VET04Ed3	Cefas	FDA	MBA	MI	GU
AMP	35-44	na	na	37-40	37-40	35-37
FLO	34-47	na	na	36-38	40-43	35-38
OXO	35-45	na	na	37-40	39-44	39-44
OXY	28-38	na	na	31	36-38	30-35

‘na’ indicates data was not available

Table S5. The distribution of MIC values for *Aeromonas salmonicida* recorded by the participating laboratories in their tests performed using the standard method specifying incubation at 22°C±2°C for 44–48h.

Cells shaded in grey indicate values that could not be determined using the microplates used in this work.

Values in red indicate MIC values of isolates categorized as WT by application of the cut-off values calculate from the multi-laboratory aggregation.

‘Off scale’ indicates the isolates for which the MICs were greater than the microplates used were capable of quantifying.

‘sd NRI’ and ‘sd ECOFFinder’ indicate the standard deviations of the WT distributions calculated by the NRI and ECOFFinder method respectively.

‘WT’ indicates the number of isolates categorized as WT by application of the cut-off values calculated from the multi-laboratory aggregation.

Table S6. The distribution of disc diffusion inhibition zones for *Aeromonas salmonicida* recorded by the participating laboratories in their tests performed using the standard method specifying incubation at 22°C±2°C for 44–48h.

Values in red indicate MIC values of isolates categorized as wild-type (WT) by application of the cut-off values calculated from the multi-laboratory aggregation.

‘sd NRI’ and ‘sd ECOFFinder’ indicate the standard deviations of the WT distributions calculated by the NRI and ECOFFinder methods, respectively.

‘CO_{WT}’ indicates the wild-type cut off values and ‘sd’ the standard deviation of the normalised WT observations calculated by NRI analysis.
