

Fig. S1. Soak times of receivers at all stations. Stations are ordered by latitude from Santa Maria (#1 – 4) in the north to Kei Mouth (#102 – 104) in the south. Black bars denote receivers that were successfully retrieved (“good”), light blue bars denote receivers that were found prior to retrieval (broke loose and washed up; “found”), and dark red bars denote receivers that were either missing on retrieval or could not be retrieved (“lost”). Demarcated zones are shaded underneath.
