

Supplementary Material

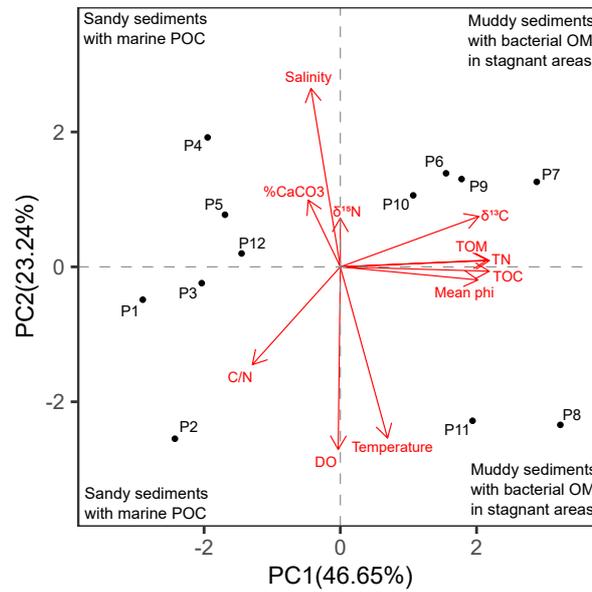

Figure S1. Identified microhabitats in Poza La Arenilla: PCA of hydrological factors, sedimentary organic matter parameters, and granulometry. DO = dissolved oxygen, TOM = Total Organic Matter, TOC = Total Organic Carbon, TN = Total Nitrogen, C/N = TOC to TN ratio, $\delta^{13}\text{C}$ = isotopic signature of the carbon in the bulk sediment, $\delta^{15}\text{N}$ = isotopic signature of the nitrogen in the bulk sediment, %CaCO₃ = carbonate

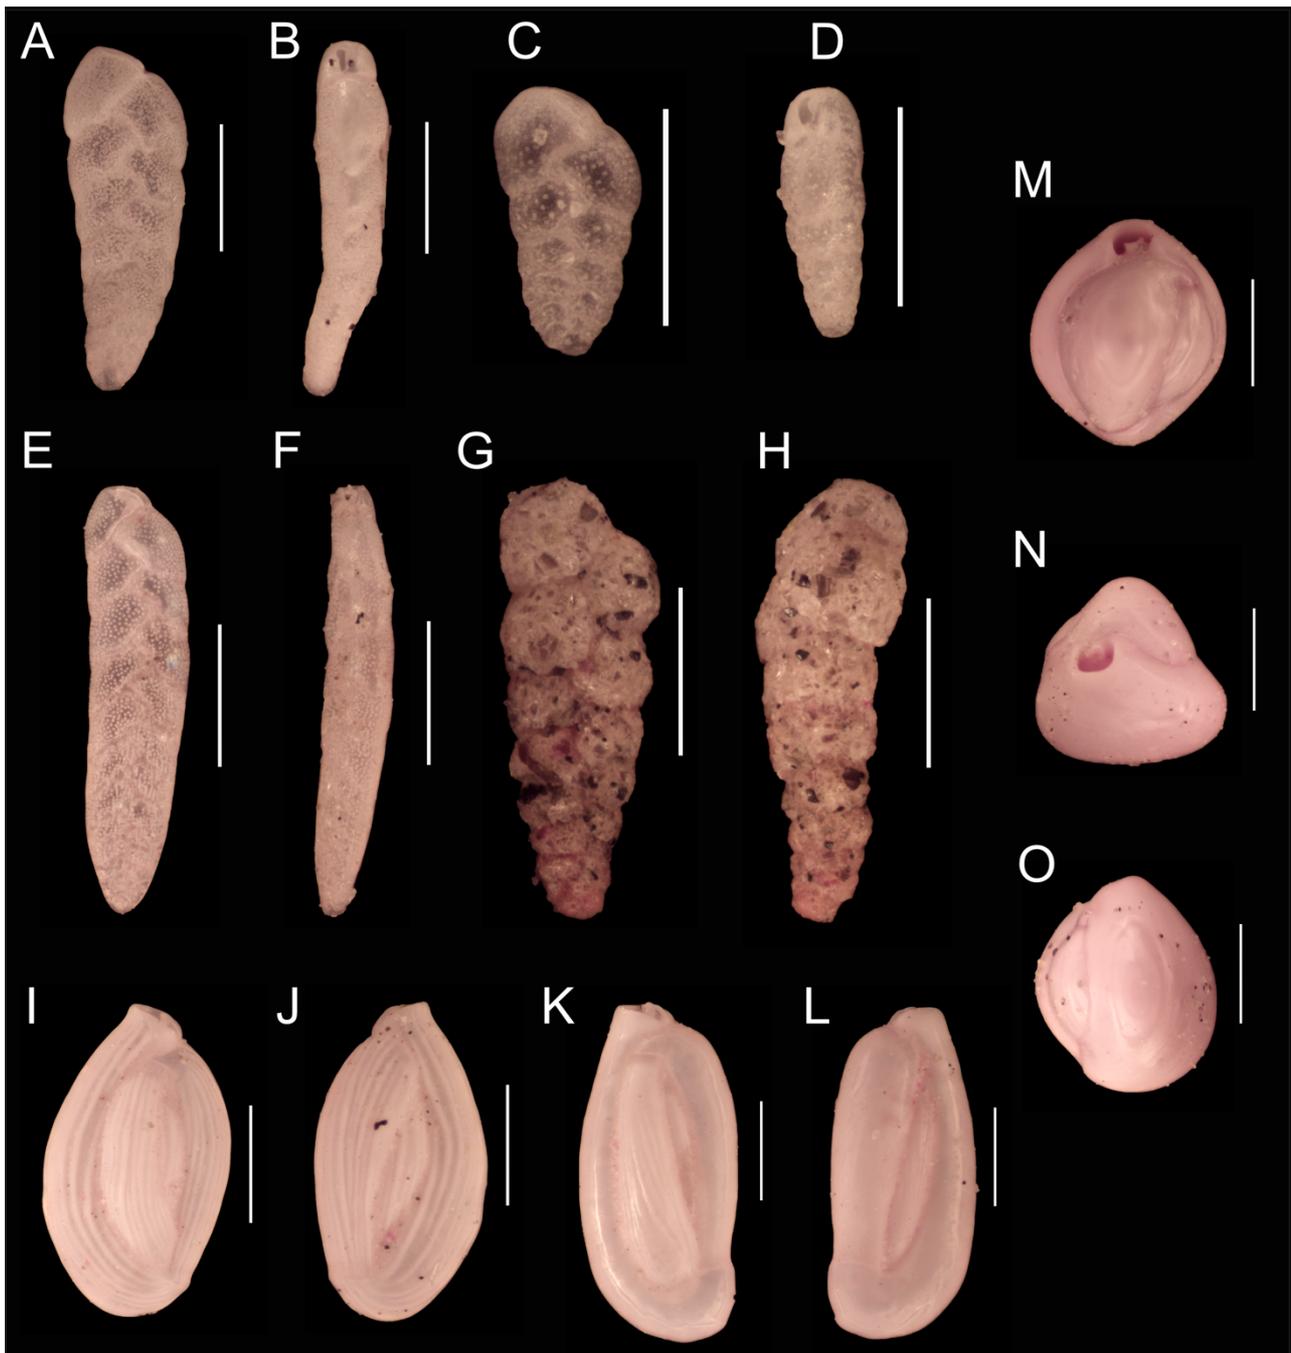

Fig. S2. Non-dominant species. A. *Bolivina* sp1, frontal view. B. *Bolivina* sp1, lateral view. C. *Bolivina* sp2, frontal view. D. *Bolivina* sp2, lateral view. E. *Bolivina* sp3, frontal view. F. *Bolivina* sp3, lateral view. G. *Textularia earlandi*, frontal view. H. *Textularia earlandi*, lateral view. I. 11 *Quinqueloculina costata*, 4-chamber side view. J. *Quinqueloculina costata*, 3-chamber side view. K. *Quinqueloculina laevigata*, 4-chamber side view. L. *Quinqueloculina laevigata*, 3-chamber side view. M. *Triloculina trigoluna*, 3-chamber side view. N. *Triloculina trigoluna*, aperture view. O. *Triloculina trigoluna*, 2-chamber side view. The scale bars represent 150 μm

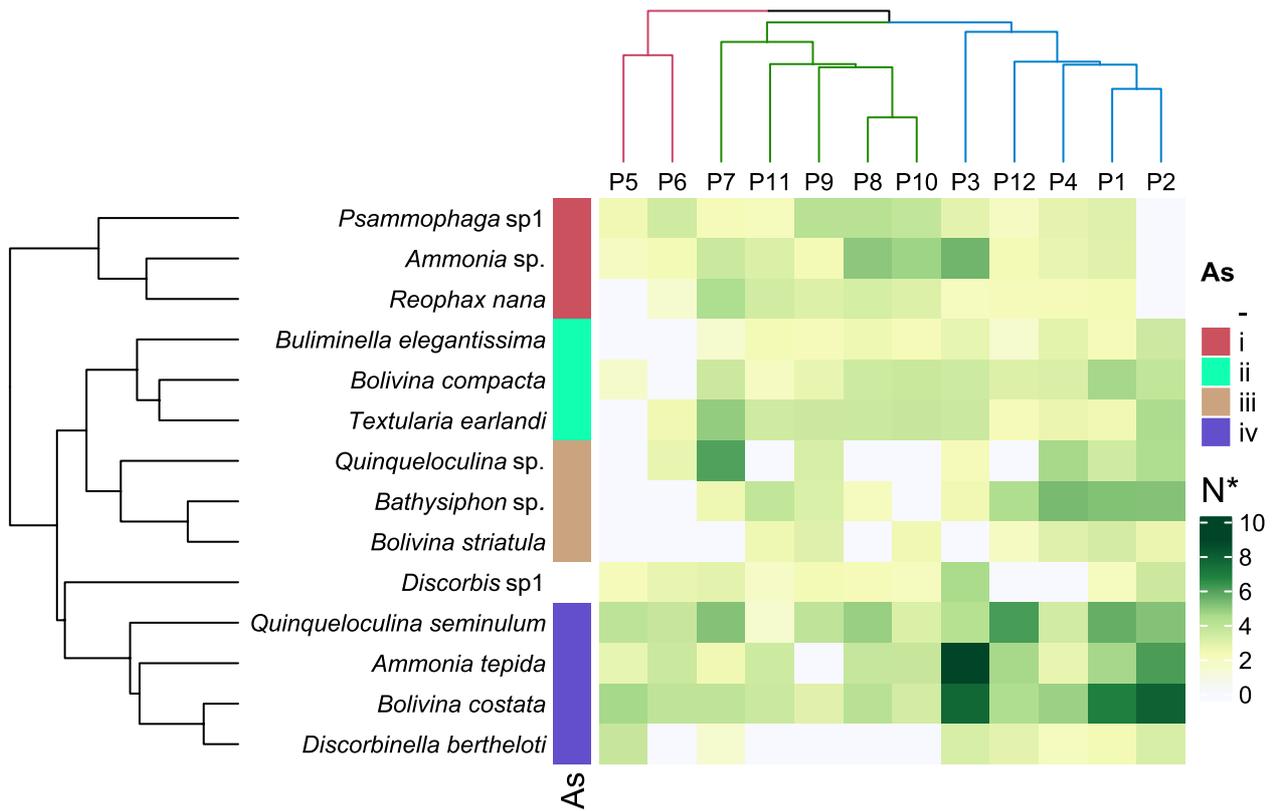

Figure S3. Heatmap of the taphocenosis. N = population density. $N^* = \sqrt[4]{N}$. As = Assemblages

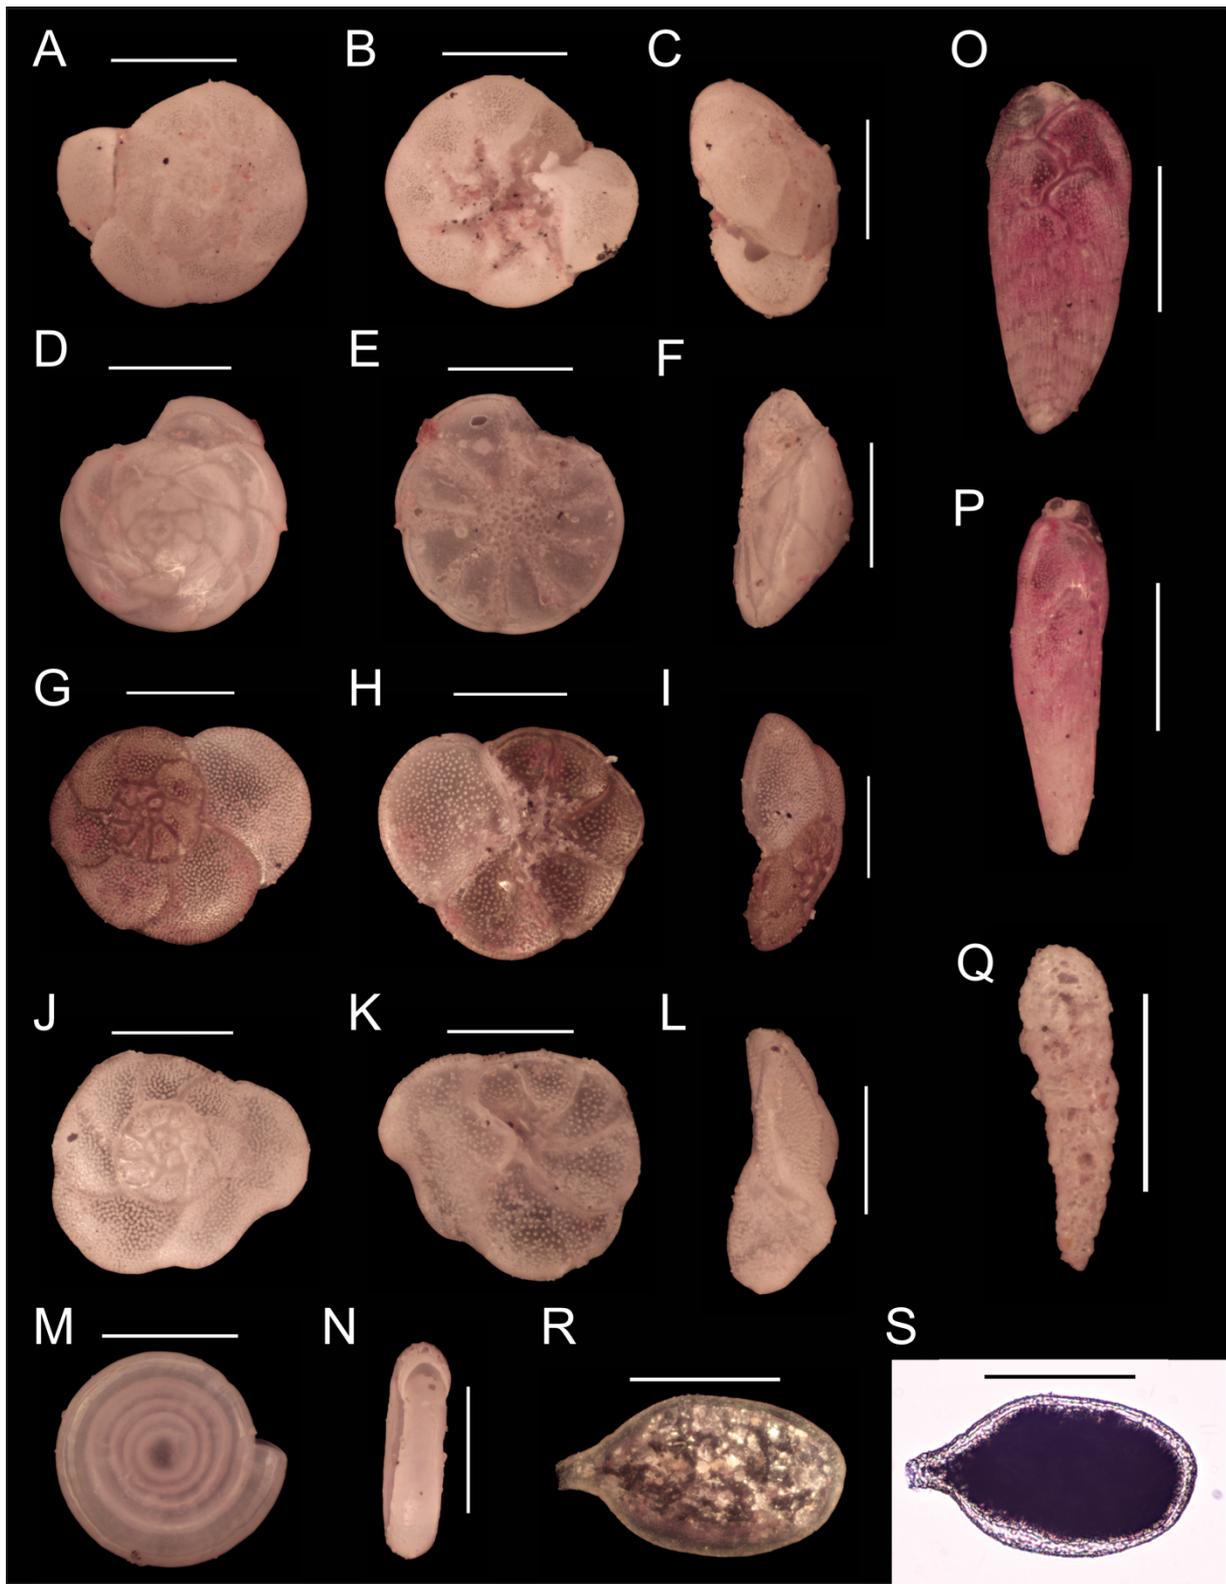

Fig. S4. Non-dominant species. A. *Ammonia* sp., dorsal view. B. *Ammonia* sp., aperture view. C. *Ammonia* sp., lateral view. D. *Buccella peruviana*, dorsal view. E. *Buccella peruviana*, aperture view. F. *Buccella peruviana*, lateral view. G. *Discorbinella bertheloti*, dorsal view. H. *Discorbinella bertheloti*, aperture view. I. *Discorbinella bertheloti*, lateral view. J. *Discorbis* sp1, dorsal view. K. *Discorbis* sp1, aperture view. L. *Discorbis* sp1, lateral view. M. *Cornuspira involvens*. N. *Cornuspira involvens*, aperture view. O. *Bolivina striatula*, frontal view. P. *Bolivina striatula*, lateral view. Q. *Reophax nana*. R. *Psammophaga* sp2, incident light view. S. *Psammophaga* sp2, transmitted light view. The scale bars represent 150 μ m

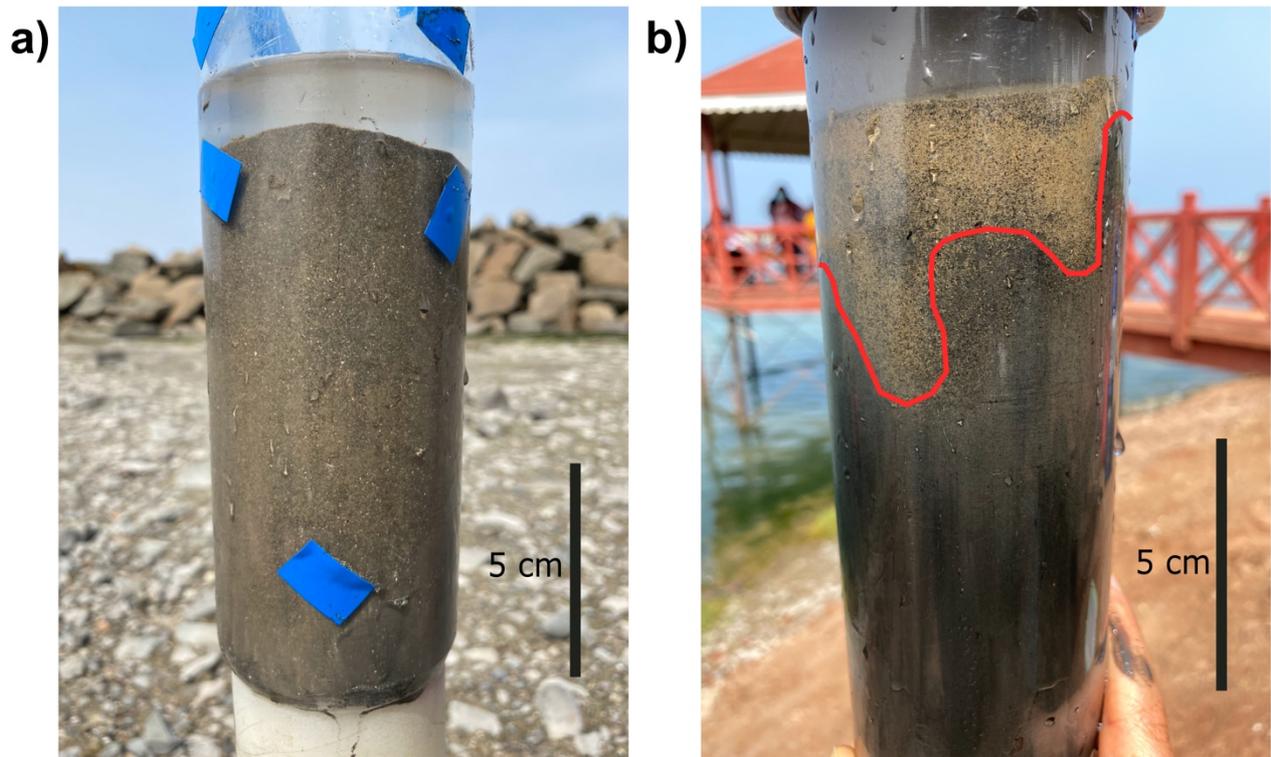

Figure S5. Sediment cores from (a) the inlet (WB1) and (b) the stagnant areas (WB2); Stations P1 and P10, respectively. The scale bar represents 5 cm, and the red line delimits the redox front

Table S1. PCA loadings and their p-values. Variables with significant p-values have bold loading values. DO = dissolved oxygen, TOM = Total Organic Matter, TOC = Total Organic Carbon, TN = Total Nitrogen, C/N = TOC to TN ratio, $\delta^{13}\text{C}$ = isotopic signature of the carbon in the bulk sediment, $\delta^{15}\text{N}$ = isotopic signature of the nitrogen in the bulk sediment, %CaCO₃ = carbonate.
